MACHINE PLASTIC-ENVELOP

Automatic Feeding of Film

Plasticizing and Flattening

Automatically senses and feeds the lamination film, eliminating complicated operations. Provides a smooth plasticizing effect, adding an extra layer of protection

Retain Memories

MACHINE PLASTIC-ENVELOP

250mm per minute

The peak laminating speed can reach 250mm per minute, enabling fast lamination

Retain Memories

MACHINE PLASTIC-ENVELOP

Fast preheating in 5 minutes

It adopts a dual quartz heating tube design, requiring only about 5 minutes of preheating after turning on the machine to laminate with 70-125mic laminating film

Cold mounting and hot lamination

Cold mounting: After turning on the machine, adjust it to the cold mounting mode for direct lamination.
Hot lamination: Set the mode to the sealing/lamination button, select the appropriate settings, and wait for the "working" green light to stay on
