New creative possibilities

Expand your creative possibilities with the optional Roll Feeder. Great for creating longer designs for home décor, shop windows and high volume cutting of repeat jobs like stickers or logos.

Matt-less loading for Roll Stickers*

With the roll feeder function, you can now load and cut rolled sticker material without the need for a mat.

*Additional purchase of roll feeder necessary. CanvasWorkspace (PC version) is necessary to be installed when you use Roll Feeder function

Half cut stickers

When the roll feeder function is selected, ScanNCut DX will automatically select the half cut feature. Just another handy feature to help you create with ease!

Never stop creating

With our extensive range of accessories, Brother and the ScanNCut DX will help you take your creative projects to the next level. Check out the rhinestone kit, printable sticker kit, line and region embossing kit, stencil sheets and so much more.

- 1,303 built-in designs with 17 fonts
- Wireless connectivity
- Precise, faster, quieter cutting

Specification correct at time of going to print. Last amendment 2018.08. #NSC0X_EN

Welcome to a whole new world of innovation

The new ScanNCut DX SDX1200 is not just a hobby machine, we've equipped it to be perfect for small business use, too. Robust and packed full of incredible features, it allows you to explore a world of design at home and at work.

The ScanNCut DX SDX1200 is a small but versatile machine. It is packed with great features that will expand your creativity to new heights.

Stand-alone
Create and edit your designs, all on the colour 5" touchscreen. The extra-large anti-glare touchscreen makes it easier than ever to edit, zoom and customise your designs without PC or mobile device required.

Blade sensor technology
Saving you time and making your cutting effortless, the fully automatic blade system takes the away any guesswork and detecting the correct cutting depth and pressure needed for the perfect cut. For even finer results, you can manually tweak the settings to suit you.

Built-in scanner
Scan virtually anything – a handmade drawing, magazine clipping, cherished photos and more – create endless draw and cut designs and save to the machine's memory.

Direct cut & half cut
Scan your material, create the outline cuts and select your design straight from the surface to cut out. The handy half cut function is great for cutting personalised stickers. Cutting designs from your favourite papers and fabrics is now hassle free.

Background scanning
Don't let small or awkward pieces of card and fabric go to waste. With our background scanning function you can place your design exactly on your leftovers, saving you mis-cuts, time and money!

WLAN connection
Wireless connection allows you to send designs directly from your free CanvasWorkspace account. There is no need for cables or USB flash drives.

Pen draw (Optional Accessories)
With ScanNCut you can change your cut file design. Whether it's from a previous scanned image or a built-in design, you can recreate the design into a drawing in a matter of seconds, with a selection of fill patterns to choose from.

SVG data readability
With the ScanNCut DX SDX1200 there is no need to convert SVG files before cutting out, as the machine can read them directly. You will have more time crafting and less time converting the files.

Scan-to-cut-data
Scan, edit and create your own designs and save it as a cut file. ScanNCut will automatically create cut lines, which can be used to cut, draw or emboss*.
*Additional purchase needed for embossing function

600dpi Scan to USB
Scan your favourite photos, drawings or large patterns on the generous scanning area of up to 297 x 603 mm with the 24" scanning mat. Save as jpeg files direct to USB flash drive.
* 24" scan mats are available as optional accessories

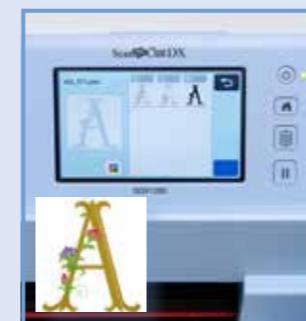

Cut up to 3 mm
Cut thicker materials like felt and foam up to 3 mm. The new 3 mm cutting blade gives you the freedom to explore a variety of materials, all with one versatile blade.

Fabric cutting (Optional Accessories)
Calling all quilters! Cut perfect quilting and patchwork pieces at the touch of a button. ScanNCut allows you to draw in your desired seam allowance and cut it, so you can spend time on what you really enjoy – creating to your heart's content.

Built-in patterns
Packed with 17 fonts and 1,303 built-in designs (including 140 quilt and appliqué patterns), the SDX1200 has something for every person, project or occasion. Choose from basic shapes, intricate designs, borders, quilt, appliqué patterns, fonts and more.

PES/PHC/PHX readability
Convert your favourite PES/PHC/PHX* embroidery data into cutting or drawing files directly on the SDX1200. Able to recognise grey, colour, outline, region and stitch lines, your converted embroidery data can now be used for beautiful cutting, line art, embossing and foiling projects.
*To read PHX file, software version should be 1.1x or higher

CanvasWorkspace – now also for PC

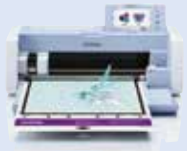

Our free cloud-based design application is now available for Windows® and MAC OS®.

Design when and where you want, then send your designs wirelessly from your computer to your ScanNCut or transfer them via USB flash drive.

CanvasWorkspace also comes with hundreds of free projects to further inspire your creativity.
